Thought for Today

➤ **From the MD's Desk:**

Dear Friend,

We had an open house on 6th September; we discussed the issues coming up in the AGM on 26th September. The idea was to see if there is a consensus on the issues. In summary, I can say that there were many disparate suggestions; but consensus was difficult to come by. In the AGM, issues can be decided by voting.

In this context, it is important for all of you to note that your views expressed by email does NOT count as a vote. You have to nominate a proxy; he should attend the AGM and cast his vote. Proxy form is available at the end of the annual report sent to you.

Some of the members had a reservation about disturbing the uniformity of Suidha by enclosing the balcony and allowing the garden to be tended by individual shareholders. Many kinds of restrictions were suggested to be imposed.

My view is that the SH should decide whether, collectively, they accept the idea that uniformity is not important in Suidha. If we allow changes and impose strict restrictions to maintain uniformity, it will serve no purpose because SH who would like these changes would still be unhappy; they will continue to accuse the management of high handedness and / or favouritism. The main purpose of tabling these resolutions is to avoid this accusation in future.

I appeal to SH to think this through; if you do allow changes, I appeal to you to be liberal so that individuals who want these changes are not disappointed.

The maintenance fee is another contentious issue. Please make up your mind - if you vote for continuing the present system of the company maintaining the estate and being responsible for all 'structural' issues, then the MF is going to go up substantially. If you say the interior changes other than 'structural' issues have to be paid for by the SH, then the conflict comes up in defining 'structural issues'. Our idea of avoiding conflict will be defeated. My appeal is that the AGM should decide on one of two things - all cottage repairs to be paid for by SH and common areas and services to be maintained by the company, OR maintain status quo with increase in MF.

A small number of defaulters who have not paid the MF have to be made to face tougher penalties. The present levy of an interest has no effect whatsoever.

I do hope you will attend the AGM in large numbers. Those of you not able to attend should give proxies for their voices to be heard.

Finally, whatever the issues, let us all strive to have our discussions in a congenial atmosphere. And, as I have stated before, let us all go with the majority opinion even if it is contrary to our personal view. The management is here to serve you. We have been doing it to the best of our ability. And, remember, we are both on the same side of the net.

Warm regards
Dr K Lakshman

➤ **Event Highlights:** Last month witnessed the following events.

29-08-2015: Carnatic Musical Concert

Sunset Club & Ladies Club with the help of Smt Vatsala Krishnaswamy of cottage # 110 arranged a Musical Concert at Manjula Gaana Mantapa (Bandstand, West of our Lake). The programme was sponsored by Smt. Vastala Krishnaswamy; courtesy by her USA brother as a Rakhee gift.

It was a mesmerising and enchanting evening. The Carnatic Musical Concert was presented by six budding artiste from the "Music Umbrella" run by Vidushi Bombay Jayashree. For about one and a half hour they enthralled the music lovers of Suvridha.

Our thanks are due to the organizing team for arranging this programme. Please click on the link below to view some photos taken on this occasion.

<https://goo.gl/photos/DywWmWSMk28SD6d98>

30-08-2015: Onam Celebrations

On 30th August 2015, the members of Suvridha Ladies Club arranged a grand Onam Sadya i.e. grand lunch served on banana leaves. The festival was inaugurated by lighting the traditional lamp. The lamp was placed near a characteristic floral design known as Pookolam. The grand lunch was attended by over 80 Suvridhites and guests.

The Kitchen staff rose to the occasion and made the Onam Sadya celebrations a grand success. For the first time, the drinking water was served to all the diners in a stainless steel tumblers (75 nos) donated by Dr. Mohan Rao. Please click on the link below to view some photos taken on this occasion.

➤ **Suvidha On The Move :**

During the month, the following developments have taken place.

○ **Suvidha Landscaping (SLC) Updates:**

- a) The proposed Japanese Garden next to the cottage # 170 is taking shape and huge shapely rocks were moved to the place using a JCB. The pending work is expected to be completed soon.
- b) The park next to the cottage No. 84 is getting ready for floral arrangements. The project is near completion.
- c) The caterpillar invasion of the front verandahs of some cottages was brought under control by spraying Cymbush solution at the cottages affected.
- d) The garden workers had a very hard time while clearing the wild growth in front of the Bandstand. At last on the day of music function the whole area was looking grand and presentable; thanks to the Herculean efforts of the workers and their supervisor.

○ **Civil / Electrical Works :**

- a) **Concrete Road repair works:** The damaged portions of arterial concrete roads of the village were attended to at several places.
- b) **Rain Water seepage in Cottages:** Following the seasonal rains, the civil engineering staff and the workers were proactive and checked the rainwater seepages in several cottages and promptly attended to the water leaks in cottages.
- c) **Damaged Telephone lines:** During the civil works pertaining to the new Car Park, the telephone lines of the security cabins were severed beyond repair. An alternative new line was drawn from the cottage No.1 and connected to the security cabin in front of the clubhouse. At present the intercom number 1214 is functioning and the residents can call that number. Civil work to connect the security cabin near the entry gate is underway.
- d) **Water supply problem:** The main power cable feeding the Bore Well near the STP was damaged and for the first time in history of Suvidha the main water storage tank got almost empty. On emergency basis 24,000 L of water was outsourced in tankers at 8 pm. Next day new cable was drawn and the Bore Well was made operational.
- e) **Two new Electricians:** With the recruitment of two electricians the problem of acute shortage of the electricians and the amount of over time incidence has been eased.

➤ **Suvidha Family News :**

- Additions to Suvidha Staff: In view of the increased work load on Electricians, two ITI qualified young and enthusiastic Electricians have been recruited. They are Mr.Ashirbad Rout with 2 years experience as technician and Mr.Manu R Badrapur who is a fresher. We extend a warm welcome to both and wish them a happy career with Suvidha.

Ashirbad Rout

Manu R Badrapur

➤ **Talent Corner:** Under this banner, we plan to introduce to our readers, the contributions of our Suvidha family members who have developed substantial special skill sets as hobbies. Hope you will all enjoy such presentation. We welcome all such talented members to participate in this endeavor.

- **Paintings:** Dr. Narayanan R, a popular gynecologist and a resident of Cottage No. 107 at SUVIDHA, will be introducing us to the fantasies of flora / fauna around the Village through his intricate miniature paintings.

Bird Of Paradise

The Birds of Paradise, also known as crane flowers is one of the most colorful flowers in the world. The name comes from its spectacular flower shape which resembles a bird's beak and head plumage. These flowers are native to South Africa and they bloom from September through May.

The flowers of the Birds of Paradise resemble a brightly colored bird in flight and so the name Birds of Paradise. The flowers make the plant an exceptionally attractive landscape plant.

Kingdom: Plantae ; Division: Magnoliophyta ; Class: Liliopsida ; Order: Zingiberales
Family: Strelitziaceae ; Genus: Strelitzia

The foliage resembles small banana leaves with long petioles. The leaves on the plant are arranged strictly in two ranks to form a fan-like crown of evergreen foliage, thick, waxy, and glossy green, making it a very attractive ornamental plant. The leaf blades are 6 inches wide and 18 inches long. The Birds of Paradise plant usually reaches a height of 4 feet.

The Birds of Paradise flower inflorescence is borne atop long scapes, or pedicels, that grow to 5 feet or more in height. The flower on the Birds of Paradise plant is the most unusual part.

A series of highly colored bracts, or modified leaves, are formed into green, red, and or purplish canoe-like structures. Bracts vary between 4-8 inches long, depending upon the age and size of the Birds of Paradise plant.

Each Birds of Paradise flower is made up of three upright orange sepals and three highly modified vivid blue petals. Two of the petals are joined together in a structure resembling an arrowhead with the third petal forming a sectary at the base of the flower.

Each bract contains 2 or more protruding Birds of Paradise florets of bright yellow or orange elongated petals and a bright blue tongue. The female part of the Birds of Paradise flower is the long extension of the blue tongue, which is extended well away from the stamens.

- **Birds of SUVIDHA:** This is a series of beautiful and at times stunning pictures of birds that are either resident of or visitors to our Village. Mr. Ashok Dey, a permanent resident of SUVIDHA since November 2010, has been able to photograph as many as 82 different species of birds in the Village.

Little Grebe

Those of you who either live in, or are regular visitors to, our Village know that by end-May our Lake had been reduced to a few small puddles. As a result those species of water birds that are regular visitors to our Lake in happier times had moved away to forage for food elsewhere. But despite the extremely low water level even in the puddles, a pair of **Little Grebe** aka **Dabchick (*Tachybaptus ruficollis*)** had started to visit our Lake almost every morning. They were obviously scouting for a nesting ground. The Dabchick is a normally drab looking plump and squat water bird around 25 cm (approx. 10") from beak to tail. In breeding plumage, the species develops rufous cheeks and neck-sides and a yellow patch at the base of bill.

In early August, the water level in the lake had risen enough to connect the puddles and our pair had built a half-submerged nest made up of sodden weeds and vegetation in the midst of some rushes near the centre of our Lake. But then the rather heavy and almost nightly downpour in the last week of August and first week of September which led to our Lake level rising to less than a meter below the high-water mark completely destroyed this nest. The good news is that this intrepid pair is just now busy building another nest, this time in a more secure location, amongst the reeds and rushes near the northern bank of the Lake. So, if on any morning you care to sit silently on one of the two garden benches under the Singapore Cherry Trees at that end of the lake, you are bound to see the two busy birds building another nest to lay eggs. Hopefully, we will soon have more Dabchicks in and around our Lake in the next few weeks.

Don't Mess With Old People

a few chuckles for the seniors
Compiled by Mr. SM Subba Rao, Cottage#139

CALL THE POLICE (True Story)

George Phillips, an elderly man from Walled Lake, Michigan, was going up to bed, when his wife told him that he'd left the light on in the garden shed, which she could see from the bedroom window. George opened the back door to go and turnoff the light, but saw that there were people in the shed stealing things.

He phoned the police, who asked "Is someone in your house?"

He said "No," but some people are breaking into my garden shed and stealing from me."

Then the police dispatcher said "All patrols are busy, you should lock your doors and an officer will be along when one is available"

George said, "Okay." He hung up the phone and counted to 30. Then he phoned the police again.

"Hello, I just called you a few seconds ago because there were people stealing things from my shed. Well, you don't have to worry about them now because I just shot and killed them both; the dogs are eating them right now" and he hung up.

Within five minutes, six **Police Cars**, a **SWAT Team**, a Helicopter, two Fire Trucks, a Paramedic and an Ambulance showed up at the Phillips' residence, and caught the burglars red-handed.

One of the Policemen said to George, "I thought you said that you'd shot them!"

George said, "I thought you said there was nobody available!"

GETTING OLDER

A distraught senior citizen phoned her doctor's office.

"Is it true," she wanted to know, "that the medication you prescribed has to be taken for the rest of my life?"

"Yes, I'm afraid so," the doctor told her.

There was a moment of silence before the senior lady replied.

"I'm wondering, then, just how serious is my condition because this prescription is marked 'NO REFILLS'."

(I LOVE THIS !)

An older gentleman was on the operating table awaiting surgery and he insisted that his son, a renowned surgeon, perform the operation. As he was about to get the anesthesia, he asked to speak to his son. "Yes, Dad, what is it?"

"Don't be nervous, son; do your best, and just remember, if it doesn't go well, if something happens to me, your mother is going to come and live with you and your wife...."

AGING

Eventually you will reach a point when you stop lying about your age and start bragging about it. This is so true. I love to hear them say "you don't look that old."

The older we get, the fewer things seem worth waiting in line for.
Mostly because we forgot why we were waiting in line in the first place!!

Some people try to turn back their odometers. Not me! I want people to know **why** I look this way.
I've traveled a long way and some of the roads weren't paved.

When you are dissatisfied and would like to go back to youth, think of Algebra.

One of the many things no one tells you about aging is that it is such a nice change from being young.

Ah, being young is beautiful, but being old is comfortable.

First, you forget names and then you forget faces. Then you forget to pull up your zipper... it's worse when you forget to pull it down.

LIFE IS LIKE THAT

Two guys, one old, one young, are pushing their carts around Wal-Mart when they collide.

The old guy says to the young guy, "Sorry about that. I'm looking for my wife, and I guess I wasn't paying attention to where I was going."
The young guy says, "That's OK, it's a coincidence. I'm looking for my wife, too... I can't find her and I'm getting a little desperate."

The old guy says, "Well, maybe I can help you find her... what does she look like?"
The young guy says, "Well, she is 27 yrs. old, tall, with red hair, blue eyes, is buxom...wearing no bra, long legs, and is wearing short shorts.

What does your wife look like?' asks the young guy. To which the old guy says, "Doesn't matter, --- let's look for yours."

THE GOLDEN RATIO AND THE ROTATION

Compiled by: Dr. P.M. Chandrasekhara, Cottage # 75

Mathematics is the language with which God has written the universe. - Galileo

A link between the Nature and the Numbers!

The snail shell ! The number of spirals in a sunflower or a pineapple !. The spirals in a pine cone !
The spirals in a cabbage ! The number of petals in a daisy flower ! The honeycomb ! The pretty fragile wings of a dragon ! Even the spirals of the galaxies above us is formed with the exact design. There exist patterns in many things around us, which, we can say, are the fingerprints of God !. Humans are programmed to find patterns in the world, because it's the only way we can give meaning to the world and ourselves. Mathematics is learnt for calculation, application. Once a while, math should be used to inspire ! Inspired by looking at the nature around us !. We can see math in many things around us !

The Fibonacci numbers 0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144... were discovered about eight centuries ago by Leonardo Fibonacci. The Fibonacci series is one in which each number is the sum of the two preceding numbers. This series is seen very often in nature. The Daisy usually has 13, 21 or 34 petals. Sunflower usually have 34, 55 or 89 petals. These numbers can also be seen in spirals of some flowers and fruits !. A sunflower has 34 seed spiral to the right and 55 to the left. A pine cone has 8 spirals to the right and 13 to the left. Leaf divergence in botany is the order in which leaves are arranged round the stem. This arrangement is based on an exceedingly complex calculation. The branches on a tree

too are arranged depending on a precise calculation !. The Fibonacci numbers are seen in the branches of a tree.

Whenever a new branch from that one, if the number of branches are counted from a horizontal plane we come across the Fibonacci series !. In the Fibonacci series, when a number is divided by the preceding number, the result is always 1.6. For instance, 13 divided by 8 is 1.6. 21 divided by 13 is 1.6. 34 divided by 21 is 1.6 and so on... This is called Golden Ratio, a number that has fascinated mathematicians, scientists, artists since centuries. There is a beautiful side to mathematics, not just calculations. ! 1.6 – this sequence appears to be the trademark of a designer, the proof of a Creator!

The divine proportion can be seen in many things. In the D N A the ratio between the helix width and cycle length is 1:1.618, the form of the human body – the ratio of the distance from the floor to the naval and the naval to head is 1:1.618. This ratio is seen all over the beautiful body !. The width of the mouth is 1.618 times the width of the nose. The width of the central incisor is 1.618 times the width of the lateral incisor. We find this Golden ratio in the heart muscles, in bronchial tube branches, in the electrical potential neurons... If we dive deeper, it's amazing to know that this Divine ratio exists in quantum physics (the study of base level energy of nature) too. The smallest building blocks of everything, little pieces of energy like the electron, the quark, the Milan, from atoms which form a string, that resonates a frequency pitch that exhibits the Golden ratio. Thus every creation exhibits this Golden ratio – right from the tiniest.

BALANCING PRIORITIES

Compiled by: Dr. P.M. Chandrasekhara, Cottage # 75

Everybody likes to sleep and the solution to that is not to reduce sleep, but to start liking something more than your sleep. Between less pleasure and more pleasure, what you will choose? More pleasure. You can never give up the lower by fighting the lower, so do not fight to give up the lower; instead happily embrace the higher, the lower will automatically get dropped. When you desire to go to the fifth rung of the ladder is insatiable, you will automatically give up the fourth rung of the ladder.

The easiest way to take a person out of hell is not to talk against the hell, instead sell heaven to him; he will automatically leave hell and go to heaven. Focus on the higher, the lower will get dropped by itself.

You will have to understand that becoming a leader is a responsibility, it is not a status. If the first success as a leader feeds your responsibility, then you remain as a beautiful human being; instead, if it feeds your ego you will turn into an ugly human being. How you handle your early success is important.

One should realise that you won't get everything you love or desire. But, you sure can love everything you get. Just think even though it's not your choice, it is the God's choice for you and that may prove to be better than your choice.

When you are not ready to face the truth, you fear. When you are not ready to accept the truth, you fear. When there is a secret in your life, you fear. When there is a part of you that the world should not know, you fear. When you are not sure about the consequences, you fear. When you have not passed your own moral judgement. You fear. In all, when you are less than what you can be, you fear. Fear distances you from yourself. In trying to hide from the world, you start hiding yourself. To live life is to live fearlessly. When you have nothing to avoid. When you have nothing to avoid, you have nothing to hide. And you have nothing to fear. True freedom is found only in transparent living. The greatest compliment one can give to oneself is to declare, " I am an open book". It is only then, for the first time, that you will experience the freedom of living with your head held high.

Every man has the responsibility to lift himself and in turn lift the world. Every man has his share of unique experience and play his part in lifting the consciousness of this world in his own ways. The only purpose of being born before the next generation is to lead the next generation into a better world.

Each of our lives can be either an example or a warning!. Be a living example. Be a living inspiration. Be a living role model. Let your life be a continuous flow of learning, earning and returning. Let those who walk into your space become better individuals.
